

INTEGRATED MANAGEMENT SYSTEM POLICY

To respond to customer demands in the fastest and most accurate way and to maximize the level of satisfaction by being organized in this direction,

- To have a strong and sustainable R&D,
- To develop according to the principle of continuous improvement by following the legal regulations and other conditions in the process from the design to the disposal of our products, in line with the goal of leaving a more livable world to future generations.
- To reveal important Quality, Environment and Occupational Health and Safety risks by using risk-based thinking and process approach and necessary analysis methods.
- While we are closely following technology, developments and environmental impacts on electronic circuitry, continuously improve the efficiency of our Management Systems and continuously train our employees in order to increase their qualifications and skills,
- To ensure that all processes can be realized in the most practical, defect-free and controllable manner,
- To provide all the information and resources necessary to achieve the goals and objectives set for all of our Management Systems and to continuously improve them.
- By following the latest technological developments; To make designs and investments that will ensure energy efficiency in production, consume less raw materials and natural resources, and produce energy efficient products,
- To separate the wastes at the source, to prevent pollution at the source and to reduce the environmental impacts during the recycling and disposal of the wastes generated.
- We are committed to ensuring the continuity of a healthy and safe working environment by taking all precautions in line with Zero Error, Zero Waste and Zero Accident targets.

Our goals and targets determined in this direction will be monitored and measured, the results will be made available to our stakeholders and will be constantly reviewed.

Onur YILMAZ
General Manager
